

**Review Form 3**

Journal Name:	<b>Asian Research Journal of Agriculture</b>
Manuscript Number:	<b>Ms_ARJA_123499</b>
Title of the Manuscript:	<b>Studies on wedge grafted Adenium (Adenium obesum) under control condition</b>
Type of the Article	

## Review Form 3

### PART 1: Review Comments

<b>Compulsory</b> REVISION comments	<b>Reviewer's comment</b>	<b>Author's Feedback</b> (Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.</b>	<i>Adenium obesum</i> , also known as the Desert Rose or Sabi Star has many ecological and medicinal uses. Propagation is creating new plants from existing ones, and it's important to multiply planting material. This vegetative propagation study may be utilized in a commercial setting in the future.	
<b>Is the title of the article suitable? (If not please suggest an alternative title)</b>	<b>Optimization of Desert Rose (<i>Adenium obesum</i> Forssk.) wedge grafted technique to enhance its performance under controlled condition</b>	
<b>Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.</b>	Based on the parameters in the paper the abstract was designed as a short information just including the details about the propagation material details.	
<b>Are subsections and structure of the manuscript appropriate?</b>	yes	
<b>Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.</b>	The author should include details about the propagation methods and propagation procedure followed in the study and should explain in detail in the materials method section Discussion is an important part of the research paper the author should include more scientific information about the propagation.	
<b>Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.</b>	The author did not follow the reference format as per the ARJA The author should change the reference format based on ARJA – Journal author guidelines The author should include the recent year reference related to the study	
<b>Minor</b> REVISION comments		
<b>Is the language/English quality of the article suitable for scholarly communications?</b>	The English quality of the paper written is good.	
<b>Optional/General</b> comments	The author before the submission of the manuscript should follow the author's guidelines of ARJA. The correction has been attached to the file. Materials and methods include propagation details. The discussion, part includes more scientific information, it will be helpful for future researchers and make more interest for the manuscript readers. The reference format should change based on the ARJA reference format, Check along with the recently published article.
