Review Form 3

PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.		
Is the title of the article suitable? (If not please suggest an alternative title)		
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.		
Are subsections and structure of the manuscript appropriate?		
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.		
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.		

Review Form 3

<p>Minor REVISION comments</p> <p>Is the language/English quality of the article suitable for scholarly communications?</p>		
<p>Optional/General comments</p>	<ol style="list-style-type: none"> 1. Please mention the type of cardiac surgery and the reason behind late presentation in abstract section 2. Kindly explain “anoxic discomfort” 3. Kindly explain the right to left shunt across VSD with normal saturation 4. Kindly mention the severity of pulmonary stenosis, comment on pulmonary venous return and size of left atrium and ventricle 5. Kindly mention the CT findings about aorto-pulmonary collateral 6. Kindly use the term aorto-pulmonary collateral instead of bronchial collaterality 7. Please mention whether pulmonary valvotomy was done or not 8. Please mention why right atrial approach was not preferred as infundibular approach has lots of known complications 9. Please reframe this sentence - In this era, the diagnostic of TOF is usually achieved during childhood. when compared to 50 years ago, a review of ToF cases demonstrated that 17, 6% of the studied population were more than 25 years old at the time of diagnostic 10. Please reframe this sentence - .In fact, our patient was living anormal life with troubling symptoms. 11. Please change this term - anatomo-physiology 12. Please clarify this sentence - Mechanisms that explain longevity in patients who remained undiagnosed and survived to their adulthood may be attributed to having a small pulmonary artery 13. Please use ToF instead of “tetralogy of fallot” in this sentence- Cardiac catheterization is essential in managing tetralogy of fallot in adults 14. Kindly reframe this sentence- A delayed diagnostic can postpone treatment. Generally, patients receiving tetralogy of fallot repair are anticipated to have excellent results [7]. Nonetheless, surgical management of TOF frequently causes anatomical and functional abnormalities in the majority valve regurgitation and right ventricular dysfunction. 15. Kindly reframe this sentence- The higher mortality in adults than the pediatric group is caused by prolonged RV dysfunction and pulmonary artery poor development, resulting in long-standing cyanosis affecting the quality of life 16. Kindly reframe this sentence. Also mention why this patient has less chance for need of pulmonary revalvulation- Patients need lifelong following-up after reparation, taking into consideration that almost all of them will undergo pulmonary revalvulation, that the management of asymptomatic patients will essentially depend on their age, and that 	

Review Form 3

	<p>physiological exploration should be considered in these patients at high risk of rhythmological complications before anyreintervention</p> <p>17. Kindly reframe this sentence - Adults with ToF who had a repair procedure often experience significantly poor mental health as well [10].The psychological effect interferes with daily life activities, but it also majorly influences the treatment plan. The burden also extent to negatively affects patients' professional career and family members.</p> <p>18. Kindly check the spelling mistakes in references and reframe the references in properly</p>
