

Review Form 3

Journal Name:	Asian Journal of Chemical Sciences
Manuscript Number:	Ms_AJOCS_123660
Title of the Manuscript:	Synthesis, and In-vitro Antibacterial Activity Studies of Characterization Oxovanadium (IV) Complexes of α -Amino Acid Schiff Bases and 1,10-Phenanthroline Ligands
Type of the Article	Research Article

General guidelines for the Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guidelines for the Peer Review process, reviewers are requested to visit this link:

Review Form 3

PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback (Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	The given manuscript involves the development of sustainable synthesis method, reducing environmental impact. It also makes the compound more useful as biological agents as well.	
Is the title of the article suitable? (If not please suggest an alternative title)	Yes	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	Yes Add molar ratio by which parent ligand and their metal complexes were synthesized. Add some results in this which one showing excellent result either Schiff base or their metal complexes.	
Are subsections and structure of the manuscript appropriate?	Synthesis procedure as well as the characterization data of Schiff base ligand is missing.	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	We'll have to show the synthesis method and data of parent ligand , only then will we understand how the complex was made. What type of changes occurred, how much better it was formed, and when the complex was formed after adding the metal ion.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form. =	Yes	
Minor REVISION comments Is the language/English quality of the article suitable for scholarly communications?	Yes	
Optional/General comments	You can also add some photo of Schiff base and their metal complexes with targeted microorganism.	

Review Form 3

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
