Manuscript Number:	Ms_AJRRGA_124182
Title of the Manuscript:	<b>Fibroscan®: Indications and Results in ambulatory patients</b>
Type of the Article	<b>Research article</b>

**Review Form 3**

**PART 1: Review Comments**

<b>Compulsory</b> REVISION comments	<b>Reviewer's comment</b>	<b>Author's Feedback</b> (Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	Fibroscan is useful for patients of chronic liver disease as well as for alcoholic or non-alcoholic fatty liver disease as well as follow up of these patients. And it is non invasive method of evaluation. It can be done in case of ascites and obese patients	
Is the title of the article suitable? (If not please suggest an alternative title)	Title can be changed . alternate title can be “ Role of Transient Elastography in chronic liver diseases”. As Fibroscan is trade mark of machine of particular company.	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	Abstract is comprehensive	
Are subsections and structure of the manuscript appropriate?	In introduction references were not given. researcher used comm(,) in tables INSTEAD of Dot(.). correction in tables required	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	By measuring the CAP value and its interpretation this method is correct . As number of patients in this study are high ,hence technically more valued study. The researcher has include wide spectrum of diseases from viral to alcoholic liver diseases. Researcher also studied the steatosis and fibrosis both and technically which is good.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	References in introductions are not mentioned . Suggestion is to give references in introduction. In references <b>et al</b> is to be used after the name of SIX authors , but researcher at places has used after 3 r 4 authors names and this requires correction.	
<b>Minor</b> REVISION comments		
Is the language/English quality of the article suitable for scholarly communications?	The language in scientific way is correct	
<b>Optional/General</b> comments		
	Correction in tables and references required(As per Vancouver style of writing the references).
