Title of the Manuscript:	<b>Orofacial Changes In The First Year Of Life In Babies Of Diabetic Mothers In Brazil.</b>
Type of the Article	<b>Original Research Article</b>

**Review Form 3**

**PART 1: Review Comments**

<b><u>Compulsory</u></b> REVISION comments	Reviewer's comment	<b>Author's Feedback</b> <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<p>Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.</p>	<p>Orofacial changes in the first year of life for babies born to diabetic mothers are critical indicators of potential health issues. These changes can affect feeding, speech development, and overall quality of life, necessitating early intervention. In Brazil, understanding these alterations is vital for developing targeted healthcare strategies, given the increasing prevalence of diabetes among pregnant women. By investigating these orofacial characteristics, the scientific community can better address the long-term developmental impacts on this vulnerable population. Furthermore, this research can inform public health policies aimed at improving maternal and infant health outcomes.</p>	
<p>Is the title of the article suitable? (If not please suggest an alternative title)</p>	<p>Yes</p>	
<p>Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.</p>	<p>Add the headings of objective of your study</p>	
<p>Are subsections and structure of the manuscript appropriate?</p>	<p>Yes</p>	
<p>Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.</p>	<p>The manuscript on orofacial changes in the first year of life in babies of diabetic mothers in Brazil is scientifically robust due to its comprehensive methodology, which includes a well-defined study population and rigorous data collection processes. The research draws on established clinical guidelines and utilizes validated assessment tools to ensure accuracy in evaluating orofacial alterations. Additionally, it incorporates a multidisciplinary approach, integrating perspectives from pediatric dentistry, endocrinology, and developmental biology, which enhances its technical soundness. The findings are contextualized within existing literature, contributing valuable insights to both local and global health discussions on the impact of maternal diabetes on infant development.</p>	
<p>Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.</p>	<p>Sufficient and recent</p>	
<p><u>Minor</u> REVISION comments</p> <p>Is the language/English quality of the article suitable for scholarly communications?</p>	<p>Communicable</p>	
<p><u>Optional/General</u> comments</p>
