

Review Form 3

Journal Name:	Asian Journal of Education and Social Studies
Manuscript Number:	Ms_AJESS_123825
Title of the Manuscript:	The Effect of Modelling Instruction on the Interest and Achievement of Lower Basic 5 Special Needs Pupils' in Special Needs Schools in Abia State, Nigeria
Type of the Article	

PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	The manuscript demonstrates that the topic is of intellectual and policy importance and addresses a gap in the scientific community. The manuscript does a good job of arguing that home economics is an important subject, and that we need evidence around teaching methods due to current failure of students.	
Is the title of the article suitable? (If not please suggest an alternative title)	Yes	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	Yes	
Are subsections and structure of the manuscript appropriate?	Yes	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	The manuscript needs work in this area. The manuscript does not address the small sample and non random sampling method. The manuscript should discuss the implications of these. The overall framing of the manuscript is too strong in its conclusions and recommendations. This study is important and can be thought of as initial evidence toward modelling techniques for learning. The experimental design is not strong enough for the conclusions given. In addition, the manuscript needs a section dedicated to explaining the modelling which was done in classrooms in detail. What did learners actually experience in the classroom?	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	The references are sufficient but only just. More literature would be better.	
<u>Minor</u> REVISION comments		
Is the language/English quality of the article suitable for scholarly communications?	No. The manuscript needs proofreading. There are many small errors.	
<u>Optional/General</u> comments	The manuscript needs a lot of work before it can be published. Especially in the framing.	

Review Form 3

PART 2:

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
