Minor REVISION comments		
Is the language/English quality of the article suitable for scholarly communications?		
Optional/General comments	The manuscript is generally well written but the author should write in scientific terms rather than common language. The study is not unique and about 17% have plagiarism from which 3% is absolute. Keywords should be changed. Figures are very good. In my opinion case series should have more than four cases. Author can publish thses 2 cases as individual case report. Otherwise manuscript is good.
