Title of the Manuscript:	Distribution Pattern of Keratinophilic Fungi in Different Ecological Conditions: A Review
Type of the Article	Review Article

PART 1: Review Comments

<u>Compulsory</u> REVISION comments	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	It has many shortcomings. The author has to be more careful while compiling the literature. At some point, they address information as they are conducting experimentation/ it as a research article instead of a review. English language writing has many mistakes. The information presented is not tempting enough to make continuity and interest. After reading few lines as a reader, I felt lost. SEE ATTACHMENT	
Is the title of the article suitable? (If not please suggest an alternative title)	It is fine. But I think the writing team should focus more.	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	Improve sentence structure. The scientific information presented is haphazard. Subheadings have no significance.	
Are subsections and structure of the manuscript appropriate?	It should be rewritten with even more appropriate information available in the literature.	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	No table, no picture, nothing. The information presented seems of no importance the way it is written.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	Reasonable.	
<u>Minor</u> REVISION comments		
Is the language/English quality of the article suitable for scholarly communications?	Better to rewrite.	
<u>Optional/General</u> comments
