

### Review Form 3

Journal Name:	<a href="#">Asian Journal of Research in Infectious Diseases</a>
Manuscript Number:	Ms_AJRID_123894
Title of the Manuscript:	A rare case of community-acquired meningitis caused by Staphylococcus aureus
Type of the Article	Original article rare case study

#### **PART 1:** Review Comments

<b>Compulsory</b> REVISION comments	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	The importance of systematic culture of cerebrospinal fluid comes in order to determine an accurate diagnosis and establish a treatment adapted to the antibiotic and avoid antibiotic resistance and multi-resistance and develop policies to reduce them.	
Is the title of the article suitable? (If not please suggest an alternative title)	The title is very appropriate.	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	Write the objective of the study in the summary in a brief manner, respecting the Lemurad method, and write the names of the antibodies in the results paragraph of the abstract. Suggestion to write the prevalence rate and the most common antibiotics	
Are subsections and structure of the manuscript appropriate?	Very suitable	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	Because this is considered a problem of the era Because it studied the most important microbes that cause meningitis Because it is considered pivotal in changing health strategies It also has strategic dimensions	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form. :	The references are somewhat old. If they were updated, it might be better. We have a study on this that authors might benefit from: -Antibiotic Resistance of Streptococcus Pneumoniae, Neisseria Meningitidis, Haemophilus Influenzae and Staphylococcus Aureus in Morocco, National Data: Meta- Analysis. -Antibiotic prescription in Morocco, national data: Meta-analysis	
<b>Minor</b> REVISION comments  Is the language/English quality of the article suitable for scholarly communications?	Very suitable	
<b>Optional/General</b> comments	Important research to improve health policies and protocols. Very good to know the most common microbes also to reduce the overprescription of antibiotics and avoid resistance.
