Title of the Manuscript:	Rare Case Of Maxillary Osteomyelitis: A Confluence Of Sinusitis, Dental Caries, Covid-19, and Diabetes.
Type of the Article	Case report

Review Form 3

PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback (Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	Osteomyelitis is a serious condition that can easily spread to neighbouring tissues as well. Also, the incidence of the same has seen an increase after the occurrence of COVID 19. Hence, a thorough knowledge of the same will be helpful. A proper description of the procedure and medication is mentioned in the manuscript that will help to control the disease at its earlier stage before its widespread.	
Is the title of the article suitable? (If not please suggest an alternative title)	Yes the title is apt and suitable.	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	Abstract is well formed. Author can add a line or two with respect to the treatment modality stated in the case report.	
Are subsections and structure of the manuscript appropriate?	Appropriate and in correct order.	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	The manuscript is well formed. Following points can be included by the author for better understanding of the topic. Author has added the radiological picture of the defect but hasn't mentioned any radiological findings in the text, which can be added. A point of connect of the diseases mentioned in the title and Osteomyelitis should be noted to give a better picture of the progression of the disease. A note on post operative care and patient instructions should be added.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	Yes proper references are cited. Some figures are being mentioned in the abstract, references valuing these figures are missing.	
Minor REVISION comments		
Is the language/English quality of the article suitable for scholarly communications?	Language is suitable and comprehensive.	
Optional/General comments		
	The clinical pictures can be of better quality.	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
