

Review Form 3

Journal Name:	Asian Journal of Research in Cardiovascular Diseases
Manuscript Number:	Ms_AJRCD_123595
Title of the Manuscript:	A Systematic review of the literature on the connection between anabolic steroids and Cardiovascular risk.
Type of the Article	

PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback (Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	The use of anabolic steroids in cardiac population is growing, especially in recent years during the pandemic. Systematic review of the available literature is much needed, as well as the updated recommendations for clinicians. I was very eager to go through the uploaded manuscript to see how the Authors handled the subject.	
Is the title of the article suitable? (If not please suggest an alternative title)	Yes.	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	Yes.	
Are subsections and structure of the manuscript appropriate?	Yes.	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	Articles for the review are correctly chosen and each article is handled correctly, although the language itself needs major revisions. Since the number of the articles included is not very high, I would like to see more detailed discussion regarding each article as well as inclusion of more data from each article (with detailed numbers). Additionally, for the article to be of more importance for the cardiac community, I encourage Authors to form at least some general recommendations of what to avoid, what to look for and what to recommend, if anabolic steroids are being used.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	References are recent enough, although for a systematic review I would expect more than 21 citations.	

Review Form 3

Minor REVISION comments Is the language/English quality of the article suitable for scholarly communications?	The article requires major language and interpunction revision.	
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
