

Review Form 3

Journal Name:	Asian Journal of Research and Reports in Ophthalmology
Manuscript Number:	Ms_AJRROP_123339
Title of the Manuscript:	Case series about the role of selective laser trabeculoplasty in the management of primary open-angle glaucoma (about 34 eyes)
Type of the Article	

PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	SLT is one line of treatment strategy of glaucoma patient	
Is the title of the article suitable? (If not please suggest an alternative title)	Formulation does not follow formal scientific language. No of eye is to be mentioned in result section only. Better to modify as follow: Role of selective laser trabeculoplasty in the management of primary open-angle glaucoma (case series)	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	Abstract Aim of work should be under separate heading No discussion section is allowed	
Are subsections and structure of the manuscript appropriate?	yes	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	this manuscript is NOT scientifically robust or technically sound	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	Very few recent references	

Review Form 3

<p>Minor REVISION comments</p> <p>Is the language/English quality of the article suitable for scholarly communications?</p>	<p>To some extent, needs edition</p>	
<p>Optional/General comments</p>	<p>Comments to author Title: Formulation does not follow formal scientific language. No of eye is to be mentioned in result section only. Better to modify as follow: Role of selective laser trabeculoplasty in the management of primary open-angle glaucoma (case series) Abstract Aim of work should be under separate heading No discussion section is allowed Aim of our study was to assess the efficacy and safety of SLT and to identify factors predictive of success. The aim of work cant be addressed by the current study due to very small sample size selection bias, lack of control group, lack of randomization, different subset of patients Study design is inappropriate since the case series are usually beneficial as initial reports of a new diagnosis or innovative treatment, understanding new diseases and providing hypotheses about disease causation Methods Inclusion criteria for glaucoma patient are lacking the optic disc changes Results:34 eyes of 17 patients means statistical bias. One eye of consecutive patient should be selected Epidimoloigc data are better represented in table rather than text Title of table should be at top of table Table 1 is too simple to be represented in a table. Text explanation is enough The last 3 paragraphs contain a lot of explanation and discussion (including complications) which is inappropriate Discussion clearly shows that the title had be extensively discussed in literature 20 y ago, with larger sample size and proper study designs. The authors should state clearly how did their work added to literature Conclusions are not supported by your work since the study lacks control group and non-randomized</p>	

PART 2:

	<p>Reviewer's comment</p>	<p>Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</p>
<p>Are there ethical issues in this manuscript?</p>	<p><i>(If yes, Kindly please write down the ethical issues here in details)</i></p>
