

Editor's Comment:

You can accept manuscript number: 2024/IJPSS/112379. However the authors should review the referencing style, to comply with the standard of the journal. In addition, figure 1 and 2 should be treated as being self explanatory. Thus for figure 1. explain key difference features between trees shown in fig. a and fig b. With figure 2, edit so that the mentioned distribution, is clearly observed.
