

Review Form 3

Journal Name:	Journal of Agriculture and Ecology Research International
Manuscript Number:	Ms_JAERI_123959
Title of the Manuscript:	Evaluation of the adaptability and yield performance of Released Sesame varieties in Western Tigray, Northern Ethiopia
Type of the Article	Original Research Article

General guidelines for the Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guidelines for the Peer Review process, reviewers are requested to visit this link:

Review Form 3

PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback (Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	This manuscript provides insights about the varietal stability at different locations of Ethiopia which will help in assessing the suitability of varieties. However Multilocation trials are a necessary step in the releasing of a variety but to conduct multilocation trials in already released variety is itself a question mark on the research done before releasing the variety. The study will be of importance if it is conducted on germplasm, or pre breeding lines before becoming a variety.	
Is the title of the article suitable? (If not please suggest an alternative title)	Adaptation assessment on already released variety is questionable. Alternative title " Assessment of yield performance of breeding lines in Western Tigray, Northern Ethiopia	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	No need of writing history about Sesame, just give brief description about the experiment and its findings.	
Are subsections and structure of the manuscript appropriate?	Elaborate the "Introduction" and "Conclusion" describing more about future prospects	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	Yes it is correct	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	Latest references have been used	
Minor REVISION comments		
Is the language/English quality of the article suitable for scholarly communications?	Language is ok, check for spellings and grammar	
Optional/General comments	Kindly recheck your study and focus more on "Genotypes yet to be released" it will make your study useful
