

### Review Form 3

Journal Name:	<a href="#">Journal of Advances in Biology &amp; Biotechnology</a>
Manuscript Number:	Ms_JABB_124475
Title of the Manuscript:	Eco-friendly management of Alternaria leaf spot of brinjal ( <i>Solanum melongena</i> L.)
Type of the Article	Original Research Article

#### PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	In the present post-Covid times, there is an increased demand in crop yield, worldwide, owing to the sudden population explosion. The situation is more demanding in developing and densely populated countries like India, where brinjal is the second most yielded crop. In such a scenario, it is of utmost importance to come up with techniques for management of diseases of brinjal that significantly decreases the crop yield, among which most common is Alternaria leaf spot disease. In this article, the authors have come up with many eco-friendly bio remedial agents for this purpose. They have also done comparative analysis to find out the most effective management strategy to rely with.	
Is the title of the article suitable? (If not please suggest an alternative title)	Yes, but more accurate title would be as below according to my suggestion- Eco-friendly management of Alternaria leaf spot of brinjal ( <i>Solanum melongena</i> L.) implementing various bio remedial agents.	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	Yes. No change in abstract is recommended.	
Are subsections and structure of the manuscript appropriate?	Yes	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	This article provides scientific data and values regarding the relative efficacy of different bio remedial agents in alleviation of Alternaria leaf spot disease of brinjal, thereby showcasing an innovative management of this condition. Moreover, the study shown is comparatively analyzed to pinpoint the most effective remedial agent i.e. foliar spray of neem leaf extract + T. viride which besides being the most effective is also eco-friendly.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	No change in references is suggested.	

**Review Form 3**

Minor REVISION comments <b>Is the language/English quality of the article suitable for scholarly communications?</b>	Yes	
<b>Optional/General</b> comments		

**PART 2:**

	<b>Reviewer's comment</b>	<b>Author's comment</b> <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<b>Are there ethical issues in this manuscript?</b>	<i>(If yes, Kindly please write down the ethical issues here in details)</i>	

**Reviewer Details:**
