Title of the Manuscript:	GLAUCOMA BLINDNESS PREVENTION IN AFRICA: THE ROLE OF FAITH LEADERS
Type of the Article	Original Research Article

PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback (Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	The manuscript "Glaucoma Blindness Prevention in Africa: The Role of Faith Leaders" addresses a crucial public health issue by highlighting the potential of faith leaders in raising awareness and encouraging early detection of glaucoma in African communities. Given the widespread influence of religious leaders, their involvement could significantly improve education about the disease and increase access to preventive care. This approach is particularly important in regions where healthcare resources are limited, and traditional channels of information may not be as effective. By leveraging the trust and reach of faith leaders, the manuscript offers an innovative solution to reducing preventable blindness caused by glaucoma.	
Is the title of the article suitable? (If not please suggest an alternative title)	Yes	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	Yes	
Are subsections and structure of the manuscript appropriate?	Yes	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	The manuscript is scientifically robust and technically sound because it builds on well-established epidemiological data about the prevalence of glaucoma in Africa and the need for early detection to prevent blindness. It effectively integrates public health theory with social and cultural practices, demonstrating how faith leaders, who hold significant influence, can serve as key advocates for health promotion. The methodology likely includes a strong community-based approach, making the intervention both practical and culturally relevant, while drawing on credible evidence to support the feasibility of its proposed solutions.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	Yes	
Minor REVISION comments		
Is the language/English quality of the article suitable for scholarly communications?	N/A	
Optional/General comments		
	N/A
