Manuscript Number:	Ms_OR_123892
Title of the Manuscript:	JUVENILE MYOPIA: The Silent Vision Understanding, Preventing, and Managing Childhood Myopia in India
Type of the Article	Review Article

Review Form 3

PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback (Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	I like this manuscript because the topic discusses cases that are often found in the community. The study is also comprehensive.	
Is the title of the article suitable? (If not please suggest an alternative title)	Not really, because the title mentioned India but the study does not specifically mention the country. And references are not specific enough. They are mostly of general myopia topics.	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	The abstract is comprehensive but it does not mention the research method to find the proper reference source.	
Are subsections and structure of the manuscript appropriate?	The structure is unusual for a review article and the reference research method was not explained. The format is more suited for a power point presentation. The pathophysiology was not showcased well. Statements made on important issues were lacking source referencing adding footnotes could help. There was no reference of pictures in the manuscript. If the pictures were referenced from another source, it should be mentioned.	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	What is discussed is already scientifically correct but because it is a review article, sources should be clearly mentioned.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form. :-	Not enough, there are some journals that might be of use e.g bullimore, brennan Juvenile-onset myopia who to treat and how to evaluate success. Eye 38, 450 – 454, 2024 Myrowitz. Juvenile myopia progression, risk factors and intervention. Saudi J Ophthalmol, 26(3) : 293-297; 2012	
Minor REVISION comments Is the language/English quality of the article suitable for scholarly communications?	Yes but need a few grammar corrections	
Optional/General comments	The article is a review thus similar statements may be found in other articles
