<b>Compulsory</b> REVISION comments	<b>Reviewer's comment</b>	<b>Author's Feedback</b> (Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.</b>	This document is of interest, as it is a global and current topic, I like how it was addressed, however, it needs to be more attractive than what we will mention during the content.	
<b>Is the title of the article suitable? (If not please suggest an alternative title)</b>	According to the title	
<b>Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.</b>	Clearly mention methodology, in order to reach the expected results	
<b>Are subsections and structure of the manuscript appropriate?</b>	Expand the subsections and this will impact references, the subtopics are short, you can support them with figures, tables and graphs, which you consider and give a plus to the manuscript.	
<b>Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.</b>	The manuscript can be strengthened and made more solid if it is supported by increasing the bibliography review and adding the previous points in subsections, it would automatically be a solid work.	
<b>Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.</b>	Adding references since it does not even cover the minimum (50), according to the instructions for authors.	
<b>Minor</b> REVISION comments  <b>Is the language/English quality of the article suitable for scholarly communications?</b>	It is appropriate to the topic and technique	
<b>Optional/General</b> comments	<p>The above should start by modifying the summary, adding references since it does not even cover the minimum (50), according to the instructions for authors.</p> <p>Review the international units of measurement, since they are not standardized in the document, for example: (12 t/ha) o (t ha<sup>-1</sup>).</p> <p>Review the entire document "et al" should be in italics.</p> <p>The manuscript must graphically reflect the message that the author intends to convey. The needs are outlined in Part 1, which would give the document a plus.</p>
