

Review Form 3

Journal Name:	Asian Journal of Geological Research
Manuscript Number:	Ms_AJGER_121236
Title of the Manuscript:	Exploring the application of advancements of instructional technology in geoscience education in nigeria.
Type of the Article	Original Research Article

Review Form 3

PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback (Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	The manuscript seems quite interesting and describes an implementation currently taking place at the Earth Science universities in Nigeria. I like the idea of using virtual trips to enhance geoscience education. However, the manuscript does not clearly explain the transition from the existing geoscience education to the proposed implementation. However, the reason for this proposal should be emphasized in the manuscript.	
Is the title of the article suitable? (If not please suggest an alternative title)	Yes, it is	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	The abstract reflects the flow of the manuscript. Only in the abstract is there mention of the proposal to enhance the educational offerings of Nigerian Earth Science universities by incorporating virtual trips. However, the reason for this proposal should be emphasized in the manuscript.	
Are subsections and structure of the manuscript appropriate?	Excluding the references, the manuscript consists of three chapters, two of which have subchapters (Introduction, Virtual Experiential Learning, and Conclusion), and one figure. I would shorten the Introduction and introduce a chapter on the state of the art of geoscience education in Nigeria.	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	I believe that to provide greater emphasis, after modifying the manuscript structure, each part could be further expanded. It's interesting to learn how the Nigerian university system works, but this information is not always readily available abroad. Providing more detailed information would allow a non-Nigerian scientist reader to better understand the proposal. Additionally, I would expand the conclusions and recommendations. Finally, the proposed figure, which is interesting, is neither cited nor described in the text.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	The reference list is missing the bibliographic citation for "Kolb 1984", which is cited in the text. Additionally, there are numerous references that are not cited in the text. It is not requested to delete the uncited references but to update the text to include these citations where necessary. Alternatively, the unused references can be removed; however, all the bibliographic citations in the reference list appear to be relevant to the manuscript.	
Minor REVISION comments		
Is the language/English quality of the article suitable for scholarly communications?	I am not a native English speaker, so I can say little about the fluency of the language. However, I would recommend reviewing the English, especially after the revisions are made.	
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
