PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	The author has described well about geoscience education in the paper as people are now increasingly more aware of the effects of climate change, sea-level rise, natural hazards and depleting water table. Geoscience education is essential to address important societal needs for natural resource development and management, natural hazards mitigation, environmental protection, and ecosystem restoration. Geoscience is field science, so virtual field courses should not be made compulsory. When students can access a field, they should go on physical field trips to see the outcrops. However, VFTs is a good alternative, when the field is not accessible.	
Is the title of the article suitable? (If not please suggest an alternative title)	The author should discuss about "Instructional Technology" in the text. Then the title will be OK	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	The abstract should be modified. This paper is not about literature review.	
Are subsections and structure of the manuscript appropriate?	yes	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	Manuscript needs modification. Need to add more about the geoscience subject as field science. VFTs should be kept as optional for the areas where physical fields are not possibl.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	Recent references need to be included. References should be cited in the text.	
Minor REVISION comments Is the language/English quality of the article suitable for scholarly communications?	Grammatical mistakes need to be corrected. The conclusion needs to be rewritten.	
Optional/General comments	Comments are mentioned in the article in track changes.
