

Review Form 3

Journal Name:	International Neuropsychiatric Disease Journal
Manuscript Number:	Ms_INDJ_122402
Title of the Manuscript:	Genetics and Epigenetic in mental health
Type of the Article	Review Article

Review Form 3

PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback (Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	This manuscript is important to the scientific community because it addresses the complex relations between genetics and epigenetics in mental health, providing an insight into the mechanisms of mental disorders. The full review article also places emphasis on the importance of genes and environmental elements playing roles in influencing people's minds with regard to their overall well-being. I like this article because it concentrates on trying to achieve personalized treatment approaches that are crucial in contributing towards better mental health outcomes. Nonetheless, it needs wider discussions on ethical implications that could arise from application of these findings	
Is the title of the article suitable? (If not please suggest an alternative title)	yes	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	no need of any change	
Are subsections and structure of the manuscript appropriate?	yes	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	The manuscript is scientifically robust and technically sound as it has thoroughly analyzed current genetics and epigenetics in mental health literature. The authors offer an articulate synthesis of findings from different researches, to guarantee that the conclusions made are based on extensive evidence. While this includes a recognition of the complex nature of mental disorders, such reviews also underline that these conditions result from multiple factors. Moreover, the document effectively conveys its comprehension of modern developments in epigenetic science thus qualifying itself for future studies within this area.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	yes references are sufficient	
Minor REVISION comments		
Is the language/English quality of the article suitable for scholarly communications?	yes	
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
