

Review Form 3

Journal Name:	Journal of Advances in Medicine and Medical Research
Manuscript Number:	Ms_JAMMR_121135
Title of the Manuscript:	Care and infection control measures in the intensive care unit with emphasis on nursing roles: narrative review
Type of the Article	

Review Form 3

PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback (Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	This article provides highlighting the significance of healthcare-associated infections (HAIs) in intensive care units (ICUs) and emphasizing the crucial role of nurses in infection control. It mentions the impact of antimicrobial-resistant pathogens, the prevalence of HAIs in ICUs, and the use of technology and ongoing education as strategies to improve infection control.	
Is the title of the article suitable? (If not please suggest an alternative title)	Yes	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	Yes but the abstract and conclusion could be more distinct; both sections seem to repeat similar points without adding substantial new information in the conclusion.	
Are subsections and structure of the manuscript appropriate?	yes	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	The literature review is comprehensive, exploring various aspects of HAIs and infection control in ICUs. It covers epidemiology and Impact of HAIs, roles of Nurses in Infection Control and barriers and Facilitators to Infection Control.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	I suggest the NOSOREA 1 study: The prevalence of healthcare-associated infection in medical intensive care units in Tunisia. Results of the multi-centre nosorea1 study, a multicenter study conducted in a North African country. This study's findings can provide valuable insights into the regional epidemiology of nosocomial infections, comparing them with other countries and highlighting the similarities and differences in healthcare-associated infection rates and management practices. Including data from a diverse set of countries can enhance our understanding of the global landscape of these infections and inform better healthcare policies and interventions.	
Minor REVISION comments Is the language/English quality of the article suitable for scholarly communications?	yes	
Optional/General comments	-Limited Geographical Scope: Although HAIs are a global issue, the article's examples and data are primarily drawn from a few regions, limiting the generalizability of its findings.
