PART1:ReviewComments

Compulsory REVISIONcomments	Reviewer'scomment	Author'sFeedback(Pleasecorrectthemanuscriptandhighlightthatpart inthemanuscript.Itismandatorythatauthorsshould writehis/herfeedbackhere)
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	This manuscript is crucial for the scientific community as it addresses the significant threat of healthcare-associated infections (HAIs), particularly those caused by antimicrobial-resistant pathogens, within Intensive Care Units (ICUs). It highlights the pivotal role that nursing care plays in infection control and patient safety, and emphasizes the need for advanced strategies and technologies to reduce infection rates. Additionally, the manuscript underscores the importance of ongoing health education to ensure adherence to safety protocols, which is vital for future healthcare professionals. Its findings and recommendations are essential for enhancing global public health, especially in the context of ICU settings.	
Is the title of the article suitable? (If not please suggest an alternative title)	Yes, the title "Care and Infection Control Measures in the Intensive Care Unit with Emphasis on Nursing Roles: Narrative Review" is suitable for this abstract. It accurately reflects the main focus of the review, which is to examine the care and infection control measures in the ICU, with a particular emphasis on the roles of nurses. This title is both descriptive and concise, making it clear to readers what the manuscript will cover.	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	Yes	
Are subsections and structure of the manuscript appropriate?	Yes	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	The manuscript appears scientifically correct as it addresses a well-recognized public health issue: healthcare-associated infections (HAIs), especially those caused by antimicrobial-resistant pathogens. It correctly emphasizes the particular vulnerability of Intensive Care Units (ICUs) to HAIs and the critical role of nursing staff in implementing infection control measures. The manuscript also appropriately discusses the advancements in infection prevention, the role of technology, and the importance of ongoing health education. Its focus on global and Brazil-specific data underscores the worldwide relevance of the problem. Overall, the scientific claims in the abstract are well-supported by existing literature and current knowledge in the field.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	Yes	
Minor REVISION comments Is the language/English quality of the article suitable for scholarly communications?	Yes	
Optional/General comments
