Journal Name:	<b>Journal of Cancer and Tumor International</b>
Manuscript Number:	<b>Ms_JCTI_122211</b>
Title of the Manuscript:	<b>DOUBLE PRIMARY CANCER: BREAST CANCER AND GASTRIC CANCER</b>
Type of the Article	<b>Case report</b>

### Review Form 3

#### **PART 1: Review Comments**

<b>Compulsory</b> REVISION comments	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	<p>I like this manuscript.</p> <p>This manuscript is of great importance to the scientific community, especially the medical community, due to the widespread prevalence of cancer and the difficulty of diagnosing it early and controlling it. It is useful that this manuscript explains that a person can be infected with two types of cancer at the same time, and this explains to the community that when a person is infected with one type of cancer, other organs of the body must be monitored to be free of the disease.</p>	
Is the title of the article suitable? (If not please suggest an alternative title)	Yes, this title is appropriate for the text of the manuscript.	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	Yes, the abstract is comprehensive and does not need to be modified.	
Are subsections and structure of the manuscript appropriate?	Yes, it is suitable.	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	This manuscript is scientifically strong and technically sound.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	The references are sufficient but need to be updated from 2020 and above.	

**Review Form 3**

<p>Minor REVISION comments</p> <p><b>Is the language/English quality of the article suitable for scholarly communications?</b></p>	<p>Yes, the language of the article is good and suitable for scientific communication.</p>	
<p>Optional/General comments</p>	<ul style="list-style-type: none"> <li>- The researcher did not mention in his manuscript the name of the institution where the case was discovered.</li> <li>- Did the researcher obtain permission from the patient and the institution where the case was discovered to publish?</li> <li>- Has the patient been exposed to radiation therapy or hormonal therapy before discovering the case? What is the name of the treatment? The researcher did not mention anything in this regard.</li> </ul> <p>The patient needs to undergo some other tests:</p> <ul style="list-style-type: none"> <li>- PET- SCAN (positron emission tomography scan)</li> <li>- MRI (Magnetic Resonance Imaging)</li> <li>- ESR (Erythrocyte sedimentation rate)</li> <li>- CRP Titer (c-reactive protein)</li> </ul> <p>5 - H-Pylori test</p> <ul style="list-style-type: none"> <li>- The results presented by the researcher in his research prove the scientific validity of this manuscript.</li> <li>- We notice in the image in Figure 1 a clear enlargement of the lymph nodes under the armpit, which prove the incidence of breast cancer.</li> <li>- We notice in the image in Figure 2 an endoscopic image of the Gastric showing an abnormal mass in the stomach, which prove the incidence of stomach cancer.</li> <li>- In Figure 3 an ultrasound image of the breast shows an abnormal mass in the breast, which confirms the case.</li> <li>- Figures 4 and 5 show a section of breast and stomach tissue, and through the image we notice the presence of abnormal cells, which confirms the case.</li> <li>- <b>The laboratory results presented by the researcher in his manuscript show a significant decrease in haemoglobin and platelets from the normal rate, as well as a decrease in albumin concentration and an increase in urea and creatinine levels, all of which are indicators that confirm the incidence of cancer.</b></li> </ul>	

**PART 2:**

	<p><b>Reviewer's comment</b></p>	<p><b>Author's comment</b> (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</p>
<p><b>Are there ethical issues in this manuscript?</b></p>	<p><i>(If yes. Kindly please write down the ethical issues here in details)</i></p>
