

Review Form 3

Journal Name:	Annual Research & Review in Biology
Manuscript Number:	Ms_ARRB_122885
Title of the Manuscript:	Rapid Assessment of Riparian Vegetation at Calyawan River, Barangay Andap, Municipality of New Bataan, Davao de Oro Province, Philippines
Type of the Article	Short Research Article

General guidelines for the Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guidelines for the Peer Review process, reviewers are requested to visit this link:

Review Form 3

PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	This is the unique study to examine Riparian vegetation along the river banks to determine the variety and abundance of flora along riverbank and also evaluate conservation status. Riparian vegetation study is important because it plays important role in maintaining ecological balance i.e. non point source of pollution in rivers.	
Is the title of the article suitable? (If not please suggest an alternative title)	yes	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	It's ok, overall very good.	
Are subsections and structure of the manuscript appropriate?	It is very good research study and subsections and structure of article of manuscript is appropriate.	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.		
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	yes	

Review Form 3

<p>Minor REVISION comments</p> <p>Is the language/English quality of the article suitable for scholarly communications?</p>	<p>Abstract Page1 Conclusion line 5 Taking into account the obvious stresses that humans have placed on the area's forest pieces, Considering the clear human-induced stresses on the forest fragments in the region,</p> <p>Introduction Para2 line5 This includes the direct absorption of chemicals, as well as indirect impacts such as the introduction of organic matter into the soil and channels, changes in water flow, and the stabilization of soil This covers both the direct absorption of chemicals and their indirect effects, such as the stability of soil, the addition of organic matter to the soil and water channels, and variations in water flow.</p> <p>Introduction Para2 line4 This will enable the development of effective management strategies to preserve the area's scenic views, which are a result of the abundant presence of animals and plants. Additionally, it will help promote ecotourism in the region. Because there are so many different kinds of plants and animals in the area, it will be possible to create management plans that will effectively conserve the area's scenic views. It will also support the region's ecotourism industry.</p> <p>Result and Discussion Classification of Plant Species in Riparian Vegetation.</p> <p>Para 2 line 1 Within the Angiosperm category of plants, the Family Fabaceae had the maximum number of genus representatives in the area. This family is ranked third in terms of the number of species among Angiosperms worldwide</p> <p>There were more representatives of the Fabaceae family of plants in the region than any other genus within the Angiosperm category. In terms of the total number of species among Angiosperms globally, this family is rated third.</p>	
<p>Optional/General comments</p>	<p>Overall all the subsections are very good.</p>	

PART 2:

	<p>Reviewer's comment</p>	<p>Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</p>
<p>Are there ethical issues in this manuscript?</p>	<p><i>(If yes, Kindly please write down the ethical issues here in details)</i></p>
