Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form. =		

Review Form 3

<p>Minor REVISION comments</p> <p>Is the language/English quality of the article suitable for scholarly communications?</p>		
<p>Optional/General comments</p>	<p>Comments on: Takayasu Arteritis and its Complications: A Report on Two Rare Cases from a Tertiary Healthcare Center in Southern India</p> <p>Abstract: Aim: Please correct the sentence- coma after Takayasu arteritis Presentation: Involvement of renal arteries is not secondary. TA involves aorta and its major branches. Please mention the type of Takayasu arteritis rather. Conclusion: Please correct the sentence.</p> <p>Introduction: Please find more and newer references. Please add something relevant to your case reports.</p> <p>Case 1: History part should be in past tense. Examination of all the peripheral pulses should be mentioned. Please also mention the medical treatment and whether consultation with other departments were made.</p> <p>Case 2: If more clear pictures of CT scan available-better</p> <p>Discussion: Insufficient. Please discuss relevant information on Takayasu arteritis mimickers and vasculitis mimickers. References are outdated and insufficient. A brief discussion on various modes of presentation of TA would be better. The missed approach to diagnosis in these cases and other modes of management should also be discussed.</p> <p>Thank You,.</p>	<p>Thank you for the useful comments to help improve our article. We have made the relevant changes to the Abstract, Introduction, the case presentations, and discussion to the best of our understanding at the moment. Unfortunately, we are unable to procure a more clear image of the CT scan for Case 2. In view of this, we would like for it to be omitted if the journal also prefers the same.</p>

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Are there ethical issues in this manuscript?</p>	<p><i>(If yes, Kindly please write down the ethical issues here in details)</i></p>
