<b>Compulsory</b> REVISION comments	<b>Reviewer's comment</b>	<b>Author's Feedback</b> (Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p><b>Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.</b></p>	<p>The manuscript on "Takayasu Arteritis and its Complications" is significant for the scientific community as it sheds light on the clinical presentations, complications, and management of a rare and complex inflammatory vasculitis. Takayasu arteritis is often difficult to diagnose due to its nonspecific early symptoms, and this report provides valuable insight into its progression and the effectiveness of therapeutic interventions like angioplasty and conservative management.</p> <p>I appreciate this manuscript for its thorough documentation of two distinct cases that highlight the diverse presentations of the disease. Its discussion on diagnostic challenges and treatment options adds practical value to the understanding and management of Takayasu arteritis. Additionally, the call for further research underscores the ongoing need for deeper exploration into this rare disease.</p>	
<p><b>Is the title of the article suitable? (If not please suggest an alternative title)</b></p>	<p><b>Title is ok</b></p>	
<p><b>Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.</b></p>	<p><b>Abstract is Ok but keywords need to be added</b></p>	
<p><b>Are subsections and structure of the manuscript appropriate?</b></p>	<p><b>Ok</b></p>	
<p><b>Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.</b></p>	<p>This manuscript appears to be scientifically robust and technically sound due to its methodical approach in documenting the two cases of Takayasu arteritis. It follows established diagnostic protocols, such as using ECG, Doppler imaging, CT aortograms, and angiography, which are widely recognized as accurate methods for detecting arterial abnormalities. The treatment methods, including angioplasty and the use of Apixaban, are aligned with current therapeutic practices for managing vascular complications in Takayasu arteritis.</p> <p>Moreover, the manuscript provides clear references to relevant literature, strengthening its scientific foundation. The discussion on the disease's pathophysiology, diagnosis, and treatment reflects a sound understanding of the subject, making it reliable for readers seeking detailed clinical insights.</p>	
<p><b>Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.</b></p>	<p><b>Yes</b></p>	
<p><u>Minor</u> REVISION comments</p> <p><b>Is the language/English quality of the article suitable for scholarly communications?</b></p>	<p>Thorough checking to be done for minor corrections of words, Grammers etc</p>
