

### Review Form 3

Journal Name:	<a href="#">Asian Journal of Biology</a>
Manuscript Number:	Ms_AJOB_124480
Title of the Manuscript:	Streptococcus pneumoniae in medical districts of Burkina Faso: serotype distribution and antibiotic susceptibility, from 2010 to 2012.
Type of the Article	Original article

#### **PART 1:** Review Comments

<b>Compulsory</b> REVISION comments	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	The importance of Streptococcus pneumoniae in medical districts of Burkina Faso: serotype distribution and antibiotic susceptibility, from 2010 to 2012. Also, in order to determine an accurate diagnosis and establish a treatment adapted to the antibiotic and avoid antibiotic resistance and multi-resistance and develop policies to reduce them	
Is the title of the article suitable? (If not please suggest an alternative title)	The title is very appropriate.	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	Briefly write the purpose of the study in the abstract, following the Lemurad method, and . Suggestion for writing the rate of action and the most common antibiotics briefly, not exceeding 250 words	
Are subsections and structure of the manuscript appropriate?	Very suitable	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	Because this is considered the problem of the era Because it studied the most important microbe that causes meningitis and also studied the serotype Because it is considered pivotal in changing health strategies It also has strategic dimensions and the correct treatment	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form. :	The references are somewhat old. If they were updated, it might be better. We have a study on this that authors might benefit from: -Antibiotic Resistance of Streptococcus Pneumoniae, Neisseria Meningitidis, Haemophilus Influenzae and Staphylococcus Aureus in Morocco, National Data: Meta- Analysis. -Antibiotic prescription in Morocco, national data: Meta-analysis	
<b>Minor</b> REVISION comments  Is the language/English quality of the article suitable for scholarly communications?	Very suitable	
<b>Optional/General</b> comments	Research is important to improve health policies and protocols and prevent the emergence of antibiotic resistance. It is very useful to know more microbes and also to reduce the overprescription of antibiotics and avoid resistance. And during the specialized treatment of individuals through genome sequencing.
