

Review Form 3

Journal Name:	International Journal of Pathogen Research
Manuscript Number:	Ms_IJPR_124050
Title of the Manuscript:	Assessment of Vibrio Species Isolated from Water Bodies in Buguma Community in Rivers State Nigeria
Type of the Article	Original Research Article

Review Form 3

PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	The manuscript throws light on the sanitary conditions of the studied water bodies which may impact population health. Nonetheless, since this is based on identification and characterization of <i>Vibrio</i> , additional biochemical tests including IMViC and urease can enhance the reliability of the study. Additionally, authors may suggest possible preventive outcomes for safeguarding population health in their discussion considering the results of their study.	
Is the title of the article suitable? (If not please suggest an alternative title)	It would be appropriate to include the word "prevalence" in the title.	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	Abstract is comprehensive.	
Are subsections and structure of the manuscript appropriate?	Yes	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	The manuscript is scientifically robust and technically sound. However, additional biochemical tests for identification of <i>Vibrio</i> will increase the robustness of this work.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form. =	Yes	

Review Form 3

<u>Minor REVISION</u> comments		
Is the language/English quality of the article suitable for scholarly communications?	Yes	
<u>Optional/General</u> comments	The manuscript highlights the microbial quality with respect to the presence of <i>Vibrio</i> of the studied water bodies which indicated the impact it can have on the population health. However, as this relies on the identification and characterization of <i>Vibrio</i> , further biochemical tests, such as urease and IMViC, can improve the study's trustworthiness. In addition, taking into account the findings of their study, authors may provide recommendations for potential preventive measures to protect population health in their discussion.	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
