

Review Form 3

Journal Name:	Journal of Scientific Research and Reports
Manuscript Number:	Ms_JSRR_124094
Title of the Manuscript:	Climate smart practices adopted in fruit crop productions
Type of the Article	

Review Form 3

PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback (Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	Authors arguments are missing. Findings of previous studies should have been analyzed.	
Is the title of the article suitable? (If not please suggest an alternative title)	Not suitable. I suggest the title be 'Adoption of climate smart practices in order to enhance fruit crop productions'	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	The abstract should serve as the window of the study! It should have included the problem, the objectives, the methods employed, the major findings, the conclusion and the recommendations.	
Are subsections and structure of the manuscript appropriate?	Somehow good!	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	The study relied on secondary data primarily literature review. It would have been better if it was empirical.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	Yes!	
Minor REVISION comments Is the language/English quality of the article suitable for scholarly communications?	The language is good but much better if coherent paragraph are used instead of using bullets for example for the following texts (paraphrasing is needed) <ul style="list-style-type: none"> • Extremes events that are difficult to predict, • More erratic rainfall pattern and • Unpredicted high temperature spell shall affect productivity. • High temperature stress during critical crop growth stages, • Intermittent and/or terminal drought, • Excess moisture stresses caused by extreme rainfall events, • Incidence of insect pest and diseases and emergence of new insect pests and diseases. 	
Optional/General comments	The idea of the study is very good but it is extremely shallow and should have been empirical.
