

Review Form 3

Journal Name:	Asian Journal of Agricultural Extension, Economics & Sociology
Manuscript Number:	Ms_AJAEES_124463
Title of the Manuscript:	The Role of Agricultural Technology in attaining food security among small farmers in Char area in Mymensingh district
Type of the Article	Research Article

PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	This manuscript is of significant importance to the scientific community, particularly in the fields of agricultural development and food security. It highlights the critical role of agricultural technology in improving the livelihoods of small-scale farmers in vulnerable regions like the char areas of Bangladesh. By focusing on the socio-demographic factors influencing food security and dietary diversity, the study provides valuable insights into how modern farming techniques and improved supply chains can enhance food production and nutritional outcomes.	
Is the title of the article suitable? (If not please suggest an alternative title)	The topic is well-structured.	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	The abstract is well written. However, I suggest that the manuscript should be taken to a professional proofreader as some of the sentences are too long and lose their meaning. Abbreviations such as HYV and OLS must be written in full at first and then abbreviated throughout the document, that way it makes the reader know what they stand for or their meaning	
Are subsections and structure of the manuscript appropriate?	The subsection and the structure are appropriate. However, the literature review must not be generic. I suggest that they add a subsection that speaks specifically to the roles of agricultural technology in attaining food security as it is part of the topic	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	The manuscript outlines a clear hypothesis that agricultural technology can improve food security for small farmers in the char areas of Bangladesh, providing a strong basis for the study. The use of an OLS regression model to estimate the effects of socioeconomic factors on dietary diversity adds methodological rigor. This statistical approach is appropriate for analyzing the impact of various independent variables on food security outcomes.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form. -	Can the authors of the manuscript try to replace old references from 1996, 2003/6/8/9, 2013/4 etc with recent ones	
Minor REVISION comments	The language is suitable, it just needs an English editor	
Is the language/English quality of the article suitable for scholarly communications?		
Optional/General comments		

Review Form 3

PART 2:

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
