<p>Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.</p>	<ol style="list-style-type: none"> 1. To showcase need for sustainable development than simply economic growth like quoting some references about the natural disasters and calamities due to over afforestation, loss of indigenous flora and fauna in place of cash crops like tea, cocoa etc. 2. Due to medical advancements, Life expectancy has increased but diseases are increasing because of use of pesticides and growth fertilizers. Commercial medical field has grown but out of reach for a down trodden community because of its cost. Many causes does not have permanent cure and lifelong dependency on medicine 3. Increase in quantity of production of food, but decrease in quality, nutrients and health conditions among survivors. 4. Decrease in fertility among humans but increase in commercial fertility hospitals These are few adverse effects of development without sustainable approach 5. To showcase need for sustainable development than simply economic growth like quoting some references about the natural disasters and calamities due to over afforestation, loss of indigenous flora and fauna in place of cash crops like tea, cocoa etc. 6. Due to medical advancements, Life expectancy has increased but diseases are increasing because of use of pesticides and growth fertilizers. Commercial medical field has grown but out of reach for a down trodden community because of its cost. Many causes does not have permanent cure and lifelong dependency on medicine 7. Increase in quantity of production of food, but decrease in quality, nutrients and health conditions among survivors. 8. Decrease in fertility among humans but increase in commercial fertility hospitals 9. These are few adverse effects of development without sustainable approach I request author to take some reference quoting these to show how serious our shift of approach towards economic growth and industrial or green revolution. Emphasis on need of educational initiatives to rectify the problems at the root level
