<b>Compulsory</b> REVISION comments	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	The study on under-five children's food security has long run impact on growth and development of the economy. The novelty and the understanding of the study should be highlighted in a better way. The special needs of the households having under-five children should be mentioned for more clarity of the problem . The background of the paper should be rewritten to understand the problem on a larger canvas.	
Is the title of the article suitable? (If not please suggest an alternative title)	YES	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	The result section of the abstract, should include all evaluation /analysis results with their sub parameters. Readers shall not be able to reach the numerical data of the research findings in this summary section. Comprehensive necessary arrangement is suggested.	
Are subsections and structure of the manuscript appropriate?	YES	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	The study sets the research question to analyse the extent of the impact of food insecurity among households having under -five children. The discussion and result section is not appropriately reflecting this extent . A general comment or observation can not reflect the impact of household food insecurity. The impact may vary depending on household composition, health and nutrition status of the mothers, pregnant and lactating mothers etc. The manuscript will be more technically sound and effective for future research with incorporation of all these factors.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	DOI of the references may be added .
