Title of the Manuscript:	Comparative In Vitro Assessment of Fungicides for Managing Fusarium oxysporum f. sp. capsici in Chilli
Type of the Article	Original Research Article

PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback (Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	<i>Fusarium oxysporum</i> f. sp. <i>capsici</i> causes Fusarium wilt in chilli plants, a devastating soil-borne disease that can lead to significant crop losses. Since chilli is an economically important spice and vegetable crop worldwide, effective management strategies are essential for sustaining its productivity.	
Is the title of the article suitable? (If not please suggest an alternative title)	--	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	Words at least 200-250	
Are subsections and structure of the manuscript appropriate?	Yes	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	The article compares the efficacy of different fungicides against the pathogen in vitro (outside a living organism, typically in a lab environment). This is crucial because the selection of the most effective fungicides can help farmers and agricultural scientists reduce the impact of the disease, improve yield, and ensure economic stability in regions where chilli is grown.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	--
