

Review Form 3

| | |
|--------------------------|--|
| Journal Name: | International Journal of Plant & Soil Science |
| Manuscript Number: | Ms_IJPSS_125123 |
| Title of the Manuscript: | EFFECT OF REDGRAM RESIDUE INCORPORATION ON YIELDS OF REDGRAM AND FOXTAIL MILLET IN REDGRAM-FOXTAIL MILLET INTERCROPPING SYSTEM |
| Type of the Article | Original Research Article |

PART 1: Review Comments

| Compulsory REVISION comments | Reviewer's comment | Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i> |
|---|---|---|
| Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part. | The topic of research is of great importance due to the search for sustainable and agroecological productions, since the development and use of biofertilizers is considered an important alternative for increasing crop yields and the partial or total replacement of mineral fertilizers, which can cause pollution problems. | |
| Is the title of the article suitable? (If not please suggest an alternative title) | The title of the article is appropriate. | |
| Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here. | The abstract of the work is complete and understandable. | |
| Are subsections and structure of the manuscript appropriate? | The structure of the work is correct. | |
| Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part. | The experimental design is adequate, with necessary treatments and repetitions. The repetition of the experiment during two campaigns increases the validity of the results, which have been analyzed statistically. The results obtained demonstrated that the integration of various alternatives, such as organic products, biofertilizers and microbial inoculants are possible, viable and beneficial to increase soil fertility and crop yield. | |
| Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form. | It is always advisable to consult as many updated bibliographies as possible. However, the proportion of bibliographical references from the last 5 years is greater than 30%, a percentage that is considered adequate. | |
| Minor REVISION comments Is the language/English quality of the article suitable for scholarly communications? | The language used is appropriate and technically correct. | |
| Optional/General comments | Do not use as keywords those that are already present in the title. | |
