## Review Form 3

### PART 1: Review Comments

<b>Compulsory</b> REVISION comments	Reviewer's comment	<b>Author's Feedback</b> (Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	In fact there is no interest to scientific community since there are many published works regarding the impact of compost.  But the interest should be locally for Nigeria or other countries using this kind of crop (eggplant)	
Is the title of the article suitable? (If not please suggest an alternative title)	Not really  I would suggest: <b>IMPACT OF VARIETY AND COMPOST TEA ON THE GROWTH AND YIELD OF AFRICAN EGGPLANT (Solanum aethiopicum L.)</b>	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	Nothing on the kind of compost used  Please correct	
Are subsections and structure of the manuscript appropriate?	no	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	The manuscript should be improved. Here some remarks: <ul style="list-style-type: none"> <li>- Give some data about the actual production of eggplant in Nigeria. How many Ha used?</li> <li>- What is the situation of compost use and production in Nigeria?</li> <li>- You have made analysis of soil before the trials but what about the composition of this soil after using compost teas</li> <li>- In your manuscript (methodology ) we should have a paragraph on the compost used: which compost? From where does it comes from? Composition ? you can not use compost teas without any word about this material</li> <li>- All you tables contains mean values without the standard deviation! Please correct.</li> <li>- As shown in table 1, the pH of soil is low, the total nitrogen too low (0.049%) but normal organic matter contents (nearly 1.5%)</li> <li>- Why you choose the depth of 30 cm for soil analysis? <b>AFRICAN EGGPLANT (Solanum aethiopicum L.) TO COMPOST TEA IN SUDAN SAVANNA AGRO-ECOLOGICAL ZONE OF NIGERIA</b></li> </ul>	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form. -	Ok Maybe you should add more references from outside Africa
