PART 1: ReviewComments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback (Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	This article is primarily a case report,	
Is the title of the article suitable? (If not please suggest an alternative title)	The title is suitable, but the content is not comprehensive	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	The abstract is insufficient; it does not mention the case report included in the manuscript	
Are subsections and structure of the manuscript appropriate?	It should be formatted as a case report.	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	I find this manuscript to lack scientific robustness and technical soundness. The limited information provided, along with outdated references and an insufficient abstract, raises concerns about the thoroughness of the research. The findings are not presented properly, and the absence of recent literature further undermines the manuscript's relevance and credibility.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	The references are quite outdated, with none after 2020; the most recent is from 2016	
Minor REVISION comments		
Is the language/English quality of the article suitable for scholarly communications?	The language and English quality of the article are acceptable	
Optional/General comments	The author can improve the manuscript by presenting it as a case report and including high-quality photos of the surgical removal and findings, with proper labeling
