

Review Form 3

Journal Name:	Asian Journal of Research in Infectious Diseases
Manuscript Number:	Ms_AJRID_120238
Title of the Manuscript:	Prevalence and Knowledge of preventive measures against select vector borne diseases among communities in Anambah State, Nigeria
Type of the Article	Original Research Article

Review Form 3

PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback (Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Please write few sentences regarding the importance this manuscript for scientific community. Why do you like (or dislike) this manuscript? Minimum 3-4 sentences may be required for this part.		
Is the title of the article suitable? (If not please suggest an alternative title)	Yes (can add the study design at the end)	
Is the abstract of the article comprehensive? Do you suggest addition (or deletion) of some points in this section? Please write your suggestions here.	<ol style="list-style-type: none"> 1. Yes, the abstract is comprehensive. 2. The author can write the full form once with the short form in brackets in the abstract itself and then use the short forms there-on throughout the article. Eg. Vector Borne Diseases (VBDs), Lymphatic Filariasis (LF) 3. It would be better if the key words are different from the words/phrases used in the title. (in my humble opinion it increases the probability of the article post publication to be found in searches) 4. The word, "descriptive" is misspelled. 	
Are subsections and structure of the manuscript appropriate?	Yes	
Please write few sentences regarding the scientific correctness of this manuscript. Why do think that this manuscript is scientifically robust and technically sound? Minimum 3-4 sentences may be required for this part.	The multiple sampling technique, enhances the generalisability of the study. The data analysis, including descriptive statistics and tests of significance provides a comprehensive understanding of the variables of the study. The study design is also appropriate followed by the methodology.	
Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.	Yes, the author has referred to sufficient articles from the past 5 years (recent advances)	
Minor REVISION comments		
Is language/English quality of the article suitable for scholarly communications?	Few grammatical corrections are needed throughout the manuscript. eg: in abstract, instead of data were collected using It should be -data was collected using...	
Optional/General comments	The validity and reliability of the questionnaire used should be mentioned. A verbal consent is not very reliable method, as it may have potential of coercion, it would have been better if the consents were in written format. Kindly check the reference numbering in the text In the study setup, details like: climate, occupation, language or population growth rate needn't be mentioned.
