

Review Form 3

Journal Name:	Asian Journal of Economics, Business and Accounting
Manuscript Number:	Ms_AJEBA_122589
Title of the Manuscript:	The Influence Of Financial Literacy, Lifestyle, And Self-Control On Student Consumptive Behavior
Type of the Article	Original Research Article

Review Form 3

PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback (Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	The topic of the reviewed article is an interesting one that can be developed in other countries as well. Currently, financial education represents a very important pillar for every citizen, but, unfortunately, not many know the principles. At the same time, taking into account the chosen target group, nowadays more and more teenagers/young people are influenced to adopt a "model behavior", copied according to social media trends, but not a rational one. The theme could be developed, so that the authorities come up with programs to support financial education in schools, high schools and other specialized institutions.	
Is the title of the article suitable? (If not please suggest an alternative title)	The title can be kept in this form. Only if the author prefers, he/she could just eliminate the independent variables and try a different wordplay to form a new title.	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	The name of the country in which the research was conducted could be added to the abstract. Also, I think the period can be deleted or the year can be added as well, if the months it was run on are kept.	
Are subsections and structure of the manuscript appropriate?	YES	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	Overall, the paper is scientifically sound. First of all, its structure is correct (Abstract, Introduction, Literature Review, Methodology, Results and Discussion, Conclusions, References). Secondly, in the Results and Discussions section, certain data are analyzed and interpreted (some also with the presentation of bibliographic sources, when reference is made to certain coefficients or statistical indicators). However, some aspects are worth reviewing: - The value in Table 2 (Self Control) - why is it recorded like that? - Taking this into account, it should be removed from future analyses, because only one indicator remains for it in table 3, which may influence the results in a negative way;	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	That list of bibliographic references is accepted, but there is always room for better (more may be added, taking into account the other recommendations in this form).	

Review Form 3

<p>Minor REVISION comments</p> <p>Is the language/English quality of the article suitable for scholarly communications?</p>	<p>YES</p>	
<p>Optional/General comments</p>	<p>In the INTRODUCTION there are some long sentences. These should be controlled a bit, as some words are repeated, which gives the impression that they are two sentences in one. Example: - With frequent shopping a person can be associated with consumptive behavior, consumptive behavior is the behavior of buying goods without having to reconsider and preferring to prioritize wants over needs (Solomon, 2014).</p> <p>It is appreciated that some recommendations have been written and that the importance of the study is motivated. These should be developed a bit and also mentioned at the end of the article.</p> <p>In the LITERATURE REVIEW part, pay attention to the following: - Consumptive Behavior - the mentioned external factors are missing - The subchapters "Lifestyle and Consumptive Behavior" and "Self-Control and Consumptive Behavior" should be developed. Also, some specialized literature can be added to the above.</p> <p>The CONCLUSIONS section is incomplete. It is recommended to develop it and add some details about the recommendations for authorities or other interested parties. Mention of future studies/directions on this research would also be appreciated.</p>	

PART 2:

	<p>Reviewer's comment</p>	<p>Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</p>
<p>Are there ethical issues in this manuscript?</p>	<p><i>(If yes, Kindly please write down the ethical issues here in details)</i></p>
