Journal Name:	International Journal of Environment and Climate Change
Manuscript Number:	Ms_IJECC_122106
Title of the Manuscript:	Role of Bio-control Agents in Mulberry Pest Management: Effective Strategies and Key Challenges
Type of the Article	

Review Form 3

PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback (Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	This manuscript is importance for the scientific community, because of this provide a scientific base to understand biocontrol agents used in mulberry plantation and effective strategies for implementing biocontrol agent. This method minimizes the ecological impact of pest control while still adhering to sustainable agriculture standards as it typically non- toxic to people and other non-target organism like pollinator and wildlife and provide safety benefits compared to chemical pesticides.	
Is the title of the article suitable? (If not please suggest an alternative title)	The title of the article is suitable.	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	The abstract of the article is comprehensive	
Are subsections and structure of the manuscript appropriate?	The subsections and structure of the manuscript are appropriate.	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	Regarding the scientific correctness of this manuscript such as: The overuse of chemical pesticides can lead to the development of pest resistance, reducing their efficacy over time and necessitating higher doses or more potent chemicals. - Biocontrol agents aid in the natural mechanisms that regulate pest populations in a way that respects ecological principles and lessens dependency on artificial chemicals is a major advancement in pest management. - Bio-control agents are living organisms that help manage pests and diseases through natural mechanisms.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	The references are sufficient and recent, however, need to arrange the position of the year time after the authors in every references.	
Minor REVISION comments		
Is the language/English quality of the article suitable for scholarly communications?	The language/ English quality of the article is suitable for schorly communications	
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
