

Review Form 3

Journal Name:	Microbiology Research Journal International
Manuscript Number:	Ms_MRJI_122349
Title of the Manuscript:	Anti-biofilm Activity of Plant Bioactive Substances
Type of the Article	Review Article

Review Form 3

PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.		
Is the title of the article suitable? (If not please suggest an alternative title)		
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.		
Are subsections and structure of the manuscript appropriate?		
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.		
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.		

Review Form 3

<p>Minor REVISION comments</p> <p>Is the language/English quality of the article suitable for scholarly communications?</p>		
<p>Optional/General comments</p>	<p>My comments for this study:</p> <ul style="list-style-type: none"> For the title: What kind of plant? Is there a specific category of plant? Or in general? I also suggest for you to be more specific with regard to the title of the study, if you are going to just discuss the synopsis, enumerate or do a experimental study. Abstract: Kindly include the scope and limitation of your study, example, this study will now discuss which bioactive substance is the most effective or least effective. It will just briefly tackle each substance's components and mechanism of action. Also for abstract: Kindly specify how did you say increased knowledge (. Increased knowledge of plant anti-biofilm agents such as alkaloids, tannins, indole, terpenes, and flavonoids, as well as their mechanisms of action—which include quorum sensing disruption, adhesion inhibition, extracellular polymeric substance modulation, and damage to the integrity of the cell membrane—is the goal of this review.) Use the word “the researchers”, instead of we in (. Furthermore, we talked about the present and the future research perspectives of these phytochemicals, including synergism with conventional antibiotics, advanced drug delivery systems like nanocomposites and microencapsulation) For grammar, I suggest use more cohesive devices. 	

PART 2:

	<p>Reviewer's comment</p>	<p>Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</p>
<p>Are there ethical issues in this manuscript?</p>	<p><i>(If yes, Kindly please write down the ethical issues here in details)</i></p>
