Journal Name:	Asian Journal of Case Reports in Surgery
Manuscript Number:	Ms_AJCRS_120577
Title of the Manuscript:	Abdominal Wall Abscess Due to Perforation of Sigmoid Colon in Presence of Diverticulosis: A Case Report with MDCT and Ultrasonography Findings
Type of the Article	Case report

Review Form 3

PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback (Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Please write few sentences regarding the importance this manuscript for scientific community. Why do you like (or dislike) this manuscript? Minimum 3-4 sentences may be required for this part.	<ul style="list-style-type: none"> - Abdominal wall abscess following colon diverticulitis is both uncommon and challenging situation - As it raises therapeutic difficulties, its presentation can offer a better understanding of this affection. - However, no data concerning abdominal wall abscess is provided. 	
Is the title of the article suitable? (If not please suggest an alternative title)	The title is misleading.	
Is the abstract of the article comprehensive? Do you suggest addition (or deletion) of some points in this section? Please write your suggestions here.	The abstract contains a lot of unessential information. It does not exhibit what is intriguing.	
Are subsections and structure of the manuscript appropriate?	<ul style="list-style-type: none"> - Title: the title is misleading as there are no data about abdominal wall abscess. - Introduction: there is a lot of redundancy. Moreover, it should contain references to statements. - Case report: does not include data neither images of the abdominal wall abscess. The title is misleading. - Discussion: can be more interesting. It should include either literature reports of abdominal wall abscess in the setting of colonic diverticulitis or clinical evidence about prophylactic colonic resection/surgical route/surgical procedure 	
Please write few sentences regarding the scientific correctness of this manuscript. Why do think that this manuscript is scientifically robust and technically sound? Minimum 3-4 sentences may be required for this part.	<ul style="list-style-type: none"> - There are no strong data validating the preventive effect on the occurrence of colon diverticulitis. - Diverticular abscess does not warrant drainage all the time. It is indicated in accordance with localisation and size - Simple suture in colon diverticular perforation is not recommended. The mainstay surgical treatment is resection 	
Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.	References are good	
Minor REVISION comments		
Is language/English quality of the article suitable for scholarly communications?	English should be revised as there are grammatical mistakes	
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
