Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	It's a very interesting topic as it reviews the changes made in the educational system. It promotes a different and "apparently" more effective way of assessment, the formative assessment. It also sheds the light on the weak points of traditional methods of learning and the challenges that follow. It promotes new and "innovative" means of learning as well.	
Is the title of the article suitable? (If not please suggest an alternative title)	Require some review, but suitable in general. For example, the word "some" maybe better off without it.
