Journal Name:	Asian Research Journal of Agriculture
Manuscript Number:	Ms_ARJA_121918
Title of the Manuscript:	PERFORMANCE EVALUATION OF EIGHTEEN GRAIN CORN VARIETIES CULTIVATED IN BRIS SOIL
Type of the Article	

Review Form 3

PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback (Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	This manuscript studies Grain corn which is an important crop that plays a major role in promoting food stability of a country, provides animal feeds and a source of employment for different stakeholders. Its therefore important to identify the best identify the best hybrid variety with high yield, wide adaptability, and high returns to farmers.	
Is the title of the article suitable? (If not please suggest an alternative title)	The topic is okay	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	The abstract has not covered the period(season) that the study was conducted . its important to compare different seasons to factors changes in weather conditions and their effect on yield performance.	
Are subsections and structure of the manuscript appropriate?	The introduction section is very shallow. The author needs to discuss all the different (18) eighteen grain corn varieties and demonstrate empirical evidence on the same from other researcher's.	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	This manuscript is scientifically sound because: . The problem addressed is clear and the findings can be generalized to other parts of the world with similar soil . The manuscript has embraced scientific material and methods in conducting the study and analyzing the findings. .The manuscript seeks to help the current farmer in decision making when selecting among the various corn breeds .	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	The references need to be arranged systematically. The researcher to adopt one of the referencing styles .	
Minor REVISION comments	The language is okay	
Is the language/English quality of the article suitable for scholarly communications?		
Optional/General comments	A good study area that seeks to solve a current problem facing majority of farmers and very useful to Government for informing policy decisions	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
