

Review Form 3

Journal Name:	Archives of Current Research International
Manuscript Number:	Ms_ACRI_121197
Title of the Manuscript:	Design and Implementation of an IoT-based Leakage Detection System for kitchens
Type of the Article	

Review Form 3

PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.		
Is the title of the article suitable? (If not please suggest an alternative title)		
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.		
Are subsections and structure of the manuscript appropriate?		
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.		
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.		

Review Form 3

<p>Minor REVISION comments</p> <p>Is the language/English quality of the article suitable for scholarly communications?</p>		
<p><u>Optional/General</u> comments</p>	<p>Comments and Suggestions for Authors In this paper, the authors propose a Design and Implementation of an IoT-based leakage detection system for kitchens. The topic is interesting and the obtained results are promising. Anyway, some aspect must be clarified and some improvements must be performed:</p> <ol style="list-style-type: none"> 1. Novelty and contribution of the paper needs to be further highlighted. 2. Why do authors choose leakage detection system for their design? 3. Can the proposed design be applied for all kinds of an IoT-based Leakage Detection System? Please explain. 4. What the performance metrics used for design validation against an existing approach? Elaborate on this part, please. 5. I think the addition of experimental validation would be a big plus. If possible, I want to ask the authors to compare his results with experimental data which was published in other papers. Therefore, this model and its results give more confidence in term of reliability and accuracy for future researchers. 6. The conclusion section is clear. Please provide the future activity of this research. I suggest to add the experimental validation of these test. 	

PART 2:

	<p>Reviewer's comment</p>	<p>Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</p>
<p>Are there ethical issues in this manuscript?</p>	<p><i>(If yes, Kindly please write down the ethical issues here in details)</i></p>
