

## Review Form 3

Journal Name:	<a href="#">Asian Journal of Agricultural Extension, Economics &amp; Sociology</a>
Manuscript Number:	Ms_AJAEES_120422
Title of the Manuscript:	Determination of Adoption Traits and Key Production Constraints of Improved Maize Varieties Using Participatory Research Appraisal
Type of the Article	

## Review Form 3

### PART 1: Review Comments

<u>Compulsory</u> REVISION comments	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write few sentences regarding the importance this manuscript for scientific community. Why do you like (or dislike) this manuscript? Minimum 3-4 sentences may be required for this part.	Improved maize varieties provides a significant pathway for increased productivity. It also increases the value of produced crops, generates rural employment, and stimulate cash flow. However, improved seed varieties were too expensive and soil fertility significantly as most important must be considered.	
Is the title of the article suitable? (If not please suggest an alternative title)	Yes	
Is the abstract of the article comprehensive? Do you suggest addition (or deletion) of some points in this section? Please write your suggestions here.	No, but have to concentrate more on aim and methodology.	
Are subsections and structure of the manuscript appropriate?	Ok. geographical diagram, its locations and names should represent in different colours.	
Please write few sentences regarding the scientific correctness of this manuscript. Why do think that this manuscript is scientifically robust and technically sound? Minimum 3-4 sentences may be required for this part.	The level of understanding of farmers' preferences and needs for released IMVs, as well as socioeconomic factors influencing their adoption is limited. The study should aim at assessing farmers' preference criteria for maize varieties and identifying factors driving the adoption of IMVs as well as major production constraints to guide varietal selection and breeding initiatives.	
Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.	Yes	
<u>Minor</u> REVISION comments		
Is language/English quality of the article suitable for scholarly communications?	Yes. It is better easy and better to understand.	
<u>Optional/General</u> comments		

### PART 2:

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
