

Review Form 3

Journal Name:	International Journal of Biochemistry Research & Review
Manuscript Number:	Ms_IJBCRR_122233
Title of the Manuscript:	Demographic Factors, Biochemical Markers, and Obstetric History Associated with the Risk of Preeclampsia in a Sudanese Population Sample
Type of the Article	

Review Form 3

PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	This manuscript holds significant value for the scientific community by shedding light on crucial factors contributing to preeclampsia among Sudanese women. I appreciate the emphasis on the role of family history as a key predictor, underlining the importance of personalized healthcare based on individual risk assessments. The inclusion of demographic, clinical, and biochemical factors provides a holistic understanding of the condition, aiding in the development of targeted interventions for at-risk populations. Overall, I admire how this study seeks to improve maternal health outcomes through informed risk identification and proactive monitoring strategies.	
Is the title of the article suitable? (If not please suggest an alternative title)	Yes, the title "Demographic Factors, Biochemical Markers, and Obstetric History Associated with the Risk of Preeclampsia in a Sudanese Population Sample" fits the manuscript well. It effectively captures the core aspects of the study – the demographic and biochemical factors, as well as obstetric history – all related to the risk of preeclampsia in a specific Sudanese population. This title is clear and insightful, making it appealing to readers interested in maternal health, epidemiology, and preeclampsia research.	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	The abstract of the article is comprehensive and provides a clear overview of the study's background, methods, results, and conclusions.	
Are subsections and structure of the manuscript appropriate?	Yes	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	This manuscript is scientifically robust and technically sound for several reasons. The methodology used adheres to established practices in the field, instilling confidence in the reliability of the results. The thorough data analysis, supported by appropriate statistical techniques, adds to the strength of the findings. Additionally, the manuscript showcases a deep understanding of the topic by incorporating current research and literature, reflecting a well-informed approach. The clear presentation and logical structure further bolster the scientific integrity of the work, making it a valuable contribution to the field.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	The references cited in the manuscript are both sufficient and recent, reflecting the current state of research in the field.	
<u>Minor</u> REVISION comments Is the language/English quality of the article suitable for scholarly communications?	Yes	
<u>Optional/General</u> comments
