

Review Form 3

Journal Name:	Journal of Advances in Biology & Biotechnology
Manuscript Number:	Ms_JABB_122100
Title of the Manuscript:	A SENSORY ANALYSIS OF SUGARCANE (CO86032) BLENDED BEVERAGES
Type of the Article	

Review Form 3

PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback (Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	The results of this research may be relevant for the household or small-scale beverage industry, as it solely involves the mixing of fresh juice. However, the research is inadequate in order to make a meaningful contribution to the broader industry due to the absence of processing technology. Sensory attributes would be influenced by processing, such as heat treatment. This study is also inadequate for use as a reference due to the absence of a comprehensive discussion of the science that underlies the sensory attribute distinctions between beverage formulations.	
Is the title of the article suitable? (If not please suggest an alternative title)	The title and the content do not seem to align with journal name: Journal of Advances in Biology & Biotechnology. No experiment involving advance technology in biology and biotechnology is presented.	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	The abstract is not comprehensive. Abstract should consist of objective, context (addressed research gap/novelty offered), methods, results, conclusion including potential implications of the study	
Are subsections and structure of the manuscript appropriate?	Materials and methods: The present study was conducted at the Post Graduate and Research Center within the department of Foods and Nutrition at Professor Jayashankar Telangana State Agriculture University which is located in Rajendranagar, Hyderabad, India. The statement in the section does not represent materials or methods.	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	The study has limited scientific and technological depth. The work appears to not meet the rigorous standards of innovation. Further developing the research with more robust methodologies and substantial findings before resubmission is recommended. Additionally, the manuscript would benefit from a more thorough review of existing research to properly contextualize the findings and demonstrate how they contribute to the biology and biotechnology area, which is the main scope of the journal.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form. -	The manuscript has a significant lack of references to relevant and recent literature (only 8 references cited). Comprehensive citations are essential for supporting arguments and situating the finding of the study within the broader academic discourse.	
Minor REVISION comments Is the language/English quality of the article suitable for scholarly communications?	The language used is sufficient; however, there is room for improvement in order to improve its readability.	
Optional/General comments
