

Review Form 3

Journal Name:	Journal of Advances in Medicine and Medical Research
Manuscript Number:	Ms_JAMMR_121857
Title of the Manuscript:	DRUG-NUTRIENT INTERACTION IN OLDER ADULTS PATIENTS USING ENTERAL NUTRITION FROM AN INTENSIVE CARE UNIT OF A UNIVERSITY HOSPITAL IN CENTRAL BRAZIL
Type of the Article	

Review Form 3

PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	Food drug interactions are important especially in the elderly A population concentrated attention recently Use of Up-to date software although not as accurate as pharmacokinetic and pharmacodynamic studies is closer to everyday practice	
Is the title of the article suitable? (If not please suggest an alternative title)	Calculated drug-enteral feeding interactions using Up-to date protocol in an elderly ICU population	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	Mean age might be given instead on number of female patients	
Are subsections and structure of the manuscript appropriate?	Mean age for the entire study population should be calculated instead of the mean age for each gender A table including demographic data should be included reducing length of the according paragraph Commorbidities should be included in this table It is impossible that an ICU elderly population donot have severe commorbidities like DM, stroke, IHD, CKD, GI bleeding, infections or lung diseases. Number of drug nutrient interactions could be related to underlined commorbidities or risk factors Authors should explain which were there criteria for enteral nutrition initiation since 52% of their patients were severe malnourished	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	Use of Up-to date software although not as accurate as pharmacokinetic and pharmacodynamic studies is closer to everyday practice Significant delay to start enteral nutrishment is a matter that should be explained Moreover association to various commorbidities and other risk factors will strengthen the final outcome	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form. :	Ekincioglu AB, Demirkan K.
