

Editor's Comment:

After reading it, its topic is important and interesting. However, I should point out some issues that the authors should address

1. The authors should check the tense of the abstract.
2. Based on the Keywords, they are just so-so and important and key factors should be preferred, the authors keep the order from the capital letter "A-Z". Besides, the number of keywords can be 5-6. The authors can add one or two.
3. In the Introduction, the materials of the paper should be just update to 2024, and the authors also can look through the recent and important paper on this topic again. It lacks important literature. In the Literature section, we should link to the recent and most literature, specially 2021-2024. Besides, we also pay more attention to the value and contribution of the paper. The authors should add it, use literature to develop the arguments. In the literature review, the authors should update the literature of 2023-2024.

The following upon the topic can be cited, I suggest that

Studies in Higher Education is the top journal in educational journals of top SSCI journals

Guo, Y., Xu, B., Lyu, B., & Chen, C. (2024). How social and emotional skills affect Chinese college student engagement in high-impact educational practices: a moderated mediation model. *Studies in Higher Education*, 1-20. <https://doi.org/10.1080/03075079.2024.2328828>

Su, W.L., Xiao, F.J., Jiang, S.F., & Lyu, B. (2024). The impact of teacher-student relationship on knowledge sharing among Chinese graduate students: The moderating roles of proactive personality. *Psychology in the Schools*, early access. <https://doi.org/10.1002/pits.23144>

Sun, G., & Lyu, B. (2022). Relationship between emotional intelligence and self-efficacy among college students: the mediating role of coping styles. *Discover Psychology*, 2, 42-60 .

<https://doi.org/10.1007/s44202-022-00055-1>

4. The authors should make the section of conclusion concise.
5. The authors should check all the language over the whole manuscript again.
6. In terms of references, due to the fact that the research requires a large amount of literature support, the current number of high-quality references is relatively small, of course DOIs included. Additionally, it is important to ensure that the format meets the requirements of Asian Journal of Education and Social Studies.
7. The authors should strictly check the format of all tables, figs, and references.

Therefore, based on the value and contribution of the present version, I should choose "Minor Revision", the authors should address these issues and welcome the revised submission in the future.
